Space Partition within Aquatic Ecosystems

Proceedings of the
Second International Congress of
Limnology and Oceanography
held in Evian, May 25–28, 1993

Guest Editor:
Gérard Balvay

Hydrobiologia publishes original articles in the fields of fundamental limnology and marine biology.

The scope of the journal is wide and includes ecology, physiology, biogeography, methodology and taxonomy. Applied (technological) papers should be of general, not solely technical interest. Very long papers and review papers will be printed on invitation only. Proceedings of specialized symposia may also be accepted for publication, if the scientific standard set by the journal is met.

Editorial policy. All papers submitted will be considered for publication. They will be evaluated by the editors and referees on the basis of their data and ideas, which should be of more than regional significance. For example, local faunal lists, or chemical 'inventories' of waters not supplemented by interpretations of a more general nature are not acceptable.

Papers should be submitted with the understanding that they are unpublished, and not printed, submitted or accepted for publication elsewhere.

Photocopying. *In the U.S.A.*: This journal is registered at the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923.
Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Kluwer Academic Publishers for users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the fee of USD 8.00 per copy is paid directly to CCC. For those organizations that have been granted a photocopy licence by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0018–8158/95/USD 8.00.
Authorization does not extend to other kinds of copying, such as that for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
In the rest of the world: Permission to photocopy must be obtained from the copyright owner. Please apply to Kluwer Academic Publishers, P.O. Box 17, 3300 AA Dordrecht, The Netherlands.

Hydrobiologia is published weekly.
Subscription price (1994–1995, 23 volumes of 3 issues): USD 4776.00 including postage and handling.
Second-class postage paid at Rahway, N.J. USPS No. 568–290.
U.S. Mailing Agent: Mercury Airfreight International Ltd., 2323 Randolph Ave., Avenel, N.J. 07001.
Published by Kluwer Academic Publishers, Spuiboulevard 50, P.O. Box 17, 3300 AA Dordrecht, The Netherlands, and 101 Philip Drive, Norwell, MA 02061, U.S.A.
Postmaster: Please send all address corrections to: *Hydrobiologia*, c/o Mercury Airfreight International Ltd., 2323 Randolph Ave., Avenel, NJ 07001, U.S.A.

INVITED LECTURES

A commentary on current approaches in the aquatic sciences
by E. Bourget & M.J. Fortin 1–16

Spatial heterogeneity as a multiscale characteristic of zooplankton community
by B. Pinel-Alloul 17–42

PART ONE: INVERTEBRATES

Genetic structure of natural populations of *Nitrobacter* in an aquatic environment
by E. Navarro, V. Degrange & R. Bardin 43–48

Diel changes in the alkaline phosphatase activity of bacteria and phytoplankton in the hypereutrophic Villerest reservoir (Roanne, France)
by D. Jamet, L. Aleya & J. Devaux 49–56

Vertical and seasonal variations of inorganic carbon allocation into macromolecules by phytoplankton population in a brown-colored and a clear-water lake
by N. Maurin, C. Amblard & G. Bourdier 57–70

The microbial loop in a humic lake: seasonal and vertical variations in the structure of the different communities
by C. Amblard, J.-F. Carrias, G. Bourdier & N. Maurin 71–84

Diel changes in the biochemical composition of the particulate matter coupled with several parameters in the hypereutrophic Villerest reservoir (Roanne, France)
by M. Michard, L. Aleya & J. Devaux 85–91

Spatio-temporal distribution of the microphytobenthic biomass in intertidal flats of Tagus Estuary (Portugal)
by V. Brotas, T. Cabrita, A. Portugal, S. Serôdio & F. Catarino 93–104

Heterogeneity of periphyton in French Mediterranean rivers
by A. Cazaubon, T. Rolland & M. Loudiki 105–114

Assessment of the bio-indicator capacity of aquatic macrophytes using multivariate analysis
by N. Grasmück, J. Haury, L. Léglize & S. Muller 115–122

Time and spatial dynamics of Mediterranean lagoon macrobenthos during an exceptionally prolonged interruption of freshwater inputs
by G. Stora, A. Arnoux & M. Galas 123–132

A comparative study of the zoobenthos of eight land–water interfaces (Lake of Geneva)
by R. Bänziger 133–140

The macroinvertebrate communities of streams draining a small granitic catchment exposed to acidic precipitations (Vosges Mountains, northeastern France)
by F. Guérold, D. Vein, G. Jacquemin & J.C. Pihan 141–148

Spatial distribution and temporal variability of some aquatic insects in the Franco-Geneva river, Allondon
by M. Dethier, J. de Sousa, C. Molander & S. Knispel 149–155

Use and partition of space and resources by two coexisting *Rhyacophila* species (Trichoptera) in a high mountain stream
by P. Lavandier & R. Cereghino 157–162

Diel patterns of feeding and vertical migration in daphnids and diaptomids during the clear water phase in Lake Geneva (France)
by N. Angeli, B. Pinel-Alloul, G. Balvay & I. Ménard 163–184

Modification of migratory behavior of planktonic Crustacea in the presence of a bloom of *Microcystis aeruginosa* (Cyanobacteria)
by J.L. Berthon & S. Brousse 185–193

Spatial and temporal distribution of the zoobenthos community in a woodland pond (Switzerland)
by B. Oertli 195–204

Spatial patterns of planktonic microcrustaceans in a small shallow lake
by G. Lacroix & F. Lescher-Moutoué 205–217

Space and time distribution of zooplankton in a Mediterranean lagoon (Etang de Berre)
by R. Gaudy, G. Verriopoulos & G. Cervetto 219–236

Feeding behavior and migrations in a natural population of the copepod *Acartia tonsa*
by G. Cervetto, M. Pagano & R. Gaudy 237–248

PART TWO: VERTEBRATES

Habitat variability and space utilization by the amphibian communities of the French Upper-Rhône floodplain
by A. Morand & P. Joly 249–257

Heterogeneity and typology of fish habitat in the main stream of a Breton coastal river (Elorn-Finistère, France)
by D. Ombredane, J. Haury & P.M. Chapon 259–268

Analysis of spatial and temporal organization in a salmonid brook in relation to physical factors and macrophytic vegetation
by J. Haury, J.-L. Baglinière, A.I. Cassou & G. Maisse 269–277

Reproduction, condition and food of adult arctic charr (*Salvelinus alpinus*, L.) in Lake Pavin (Massif Central, France)
by J.-L. Jamet 279–288

Sand smelt (*Atherina boyeri*) migration within the water system of the Camargue, southern France
by E. Rosecchi & A.J. Crivelli 289–298

Spatial pattern of size distribution of four fish species on Réunion coral reef flats
by P. Chabanet & Y. Letourneur 299–308

Microhabitat requirements for settlement of juveniles sparid fishes on Mediterranean rocky shores
by M.L. Harmelin-Vivien, J.G. Harmelin & V. Leboulleux 309–320

Spatial and temporal separation of littoral zone fishes of Lake Geneva (Switzerland–France)
by O. Rossier 321–327

Effects of vertical prey distribution on the food-searching behavior of Danube bleak *Chalcalburnus chalcoides mento*
by F. Uiblein 329–333

Temporal distribution of perch (*Perca fluviatilis* L.) in a lake-reservoir (Moselle, France): analysis of catches with vertical gill nets
by A. Flesch, G. Masson & J.-C. Moreteau 335–343

Impact of *Caulerpa taxifola* colonization on the littoral ichthyofauna of North-Western Mediterranean sea: preliminary results
by P. Francour, M. Harmelin-Vivien, J.G. Harmelin & J. Duclerc 345–353

Ichthyogeographic regions and watershed size in the French river Rhône network
by T. Changeux & D. Pont 355–363

PART THREE: METHODOLOGY

In situ observation of suspended solid aggregates in rivers
by M.A. Maldiney & J.M. Mouchel 365–373

Multi-scale heterogeneity in a macrobenthic epifauna community
by A. Migné & D. Davoult 375–381

Examination through a Principal Component Analysis of the phosphorus exchanges between sediments and water in trophically different reservoirs
by M. Alaoui Mhamdi, L. Aleya & J. Devaux 383–389

^{31}P-NMR study of natural phytoplankton samples
by J. Feuillade, G. Bielicki & J.-P. Renou 391–398

Mass-marking of bone tissue of *Coregonus lavaretus* L. and its potential application to monitoring the spatio-temporal distribution of larvae, fry and juveniles of lacustrine fishes
by R. Rojas Beltran, A. Champigneulle & G. Vincent 399–407

A survey of the spawning of perch (*Perca fluviatilis*), pike (*Esox lucius*), and roach (*Rutilus rutilus*), using artificial spawning substrates in lakes
by C. Gillet & J.P. Dubois 409–415

An acoustic telemetry study of seabream (*Sparus aurata* L.): first results on activity rhythm, effects of environmental variables and space utilization
by M.-L. Bégout & J.-P. Lagardère 417–423

Using multivariate analyses for separating spatial and temporal effects within species–environment relationships
by E. Franquet, S. Dolédec & D. Chessel 425–431

Contribution of mathematical modeling to lake ecosystem understanding: Lake Bourget (Savoy, France)
by B. Vinçon-Leite, B. Tassin & J.-M. Jaquet 433–442

INDEX 443–444
